Central Bank of Armenia Hosts Seminar on Scenario Analysis

09.10.2026

From October 5 to 9, the Central Bank of Armenia hosted a five-day seminar entitled “Scenario Analyses” at its Dilijan Training and Research Center.

The seminar focused on the Prudent Risk Management Approach to Monetary Policy (FPAS Mark II), highlighting the role of scenario analysis in monetary policy decision-making under conditions of uncertainty.

The program combined theoretical lectures with hands-on exercises covering the assessment of the monetary policy stance, identification of economic risks, and development of alternative macroeconomic scenarios.

The seminar concluded with team presentations, during which participants shared the results of their practical exercises and discussed their application to monetary policy analysis.
